

We keep meat fresh.

One of the biggest challenges in food packaging is the preservation of meat, poultry and seafood products.

With five decades of industry experience, we've mastered how to manufacture top-of-the-line packaging solutions for virtually every type of fresh and processed meat, poultry, and seafood.

Our products feature ease of use, along with functionality and esthetics.

Sustainability

Developing and producing strong, light films and bags – low carbon footprint

Shelf Impact

Various options for shaping and printing films, unrivaled transparency & gloss

Convenience

Improving packaging functionality with easier opening and reclosable products

Performance

High-quality, high-machinability, time-saving, cost-effective solutions

From bulk packaging to high shelf impact, we offer a diverse selection of flexible packaging solutions to preserve the unique aroma, texture and taste of meats.

Thermoformable Films Multiform Range

Our field-proven Multiform range of forming films are an optimal solution for deep draw applications and ideal for packaging beef, pork, lamb or veal in a subprimal cut, portioned cut or ground meat products.

Key Features

- Outstanding forming properties enable deep draw with thinner forming films
- Excellent gloss and clarity offer premium product presentation
- Down-gauged forming films with equivalent performance to thicker conventional films
- Optimal performance with all types of automatic thermoforming machines

Products

Multiform X-treme

Produced with revolutionary Aquafrost technology, Mutiform X-treme has better optical properties than cast film, while retaining the excellent forming and mechanical properties of blown film

Multiform FW

It's unique structure allows significant down-gauging of the packaging thickness. Available in a wide variety of tints and colors

Lidding Films and Top Webs Toplex / Topaz Range

Fresh, processed, or cooked poultry? Smoked deli meats? We apply our knowledge and in-depth experience to our Toplex and Topaz range of lidding and top webs films for packaging of virtually all meats, poultry and seafood.

Key Features

- Thin top webs maintain quality and taste while reducing packaging volume
- Excellent performance with automatic thermoforming, flow pack and tray sealing machines; reduces product unit cost by minimizing waste and downtime
- Wide range of ease-of-use properties: reclosable and easy peel
- Clear, printable glossy films so your brand can stand out on the shelf

Products

Toplex Locked Seal

With excellent mechanical properties, these films seal through product residue at a wide range of temperatures and to multiple sealing layers

Toplex HB HT

Super-thin, non-laminated, shrink-to-fit, high-barrier lidding film; perfect for presenting your meat products at their freshest

Toplex RC

Reclosable lidding, ideal for multi-serve sliced lunch meats that demand high functionality and customer convenience

Toplex Peelable

Hermetic seal with easy opening that truly performs; for packagers, retailers and consumers

Toplex Permeable

Highly permeable lidding film for 10K OTR to meet FDA recommendation for packaging chilled fish

Toplex FP

Co-extruded and laminated film specifically designed to work trouble free on all VFFS & HFFS packaging machines. Featuring optimal coefficient of friction and outstanding clarity and gloss

Topaz

Extremely thin film with exceptional optical and anti-fog properties. Suitable for PET-based trays

Vacuum Skin Packaging Plastofresh Range

Whether it's a whole fish or fillets, fresh meat or smoked, our Plastofresh VSP packaging boosts consumer appeal by showing off the colors and textures of the premium food product inside.

Key Features

- Designed for trouble-free performance with manual and semi-automatic packaging machines
- Excellent performance, outstanding puncture-resistance properties
- Various sealing strength, seals to various bottom webs and trays and to itself
- Excellent optical and forming properties for premium product presentation

Products

Plastofresh HB

A high-barrier film suitable for refrigerated cheese, featuring "second skin", optimum gloss and transparency properties, as well as excellent sealing and mechanical advantages

Plastofresh P

Low-barrier permeable film suitable for frozen products, featuring "second skin", optimum gloss and transparency properties, as well as excellent sealing and mechanical advantages

Pouches and Bags Plastobarr Range

Our Plastobarr range provides a variety of vacuum and MAP pouches specifically suited for food service and retail industries, as well as large vacuum pouches suitable for packing meat and poultry through the entire in-house packaging process.

Key Features

- Especially designed for trouble-free operation with all types of vacuum pouch and MAP packaging machines
- Made of recyclable materials; environmentally friendly food packaging solution
- Excellent mechanical properties at low thickness
- Excellent seal properties, high hot tack, sealing through product residue
- Wide range of thicknesses and gas transmission levels for optimal shelf life of each product

Products

Plastobarr HB/MB

Symmetrical medium-barrier and high-barrier pouches for MAP applications. Excellent for intermediate packaging for food service and retail industries

Plastogold/Plastomatt

High-barrier pouches with gold/silver back; ideal for packing sliced fish, meat and poultry, featuring excellent clarity and gloss of the transparent side

Plastobarr XU

Symmetrical medium-barrier pouch designed for vacuum and MAP applications predominately for bulk packaging of meat and poultry. Can be surface printed for plant/brand identification

Product Innovation

Thermo-Cook, our cook-in-a-bag solution, is an ideal package for easy cooking and roasting of seasoned meat, poultry and fish.

Packaging Solutions

Meat, fish, poultry; ready-to-cook or prepared; we've got the package to fit. As meeting our customer's individual needs is our highest priority, we offer you a diverse portfolio of solutions.
